

CONTENTS

Foreword ix

Preface xii

Acknowledgements xiv

PART ONE Theoretical insights 1

01 The irrational consumer: introduction 3

How the view of the rational consumer crumbled 5

Hunter-gatherers in the shopping mall 6

The irrational non-conscious 8

Dual-process decisions 12

The types of data that are hard to measure rationally 13

How the irrational can be decoded 16

How companies are using this data 18

Summary 19

Notes 19

02 The brain: attention, memory and emotion 21

Attention 22

Memory 27

Emotion 30

Embodied cognition 31

Summary 33

Notes 34

03 Neuroaesthetics 35

Beauty 37

Faces 39

Colours 40

Culture 40

Eight neuro-principles and their implications	41
Using neuro-principles	51
Summary	51
Notes	52

04 Behavioural economics 53

Value is not rationally objective	54
Ecological rationality	56
Heuristics	59
Nudges: small interventions with big effects	64
Choice architecture and the \$300 million button	66
Summary	67
Notes	68

PART TWO The new research tools 71

05 Guidelines for experiments 73

Principles for neuro-testing	75
Realism versus control	76
Recruitment and cultural differences	78
Benchmarking and normalizing	78
Lab, online and real-world testing	79
Interesting questions for experiments	81
Summary	86
Notes	87

06 Eye-tracking 89

How we see	90
Detail versus gist	91
Eye-trackers	93
What draws the eye?	98
Fixation predicts choice	100
Pros and cons	102
Summary	103
Notes	103

07 Implicit response measures 105

Implicit memory webs 106

Academic underpinning 108

The Implicit Association Test (IAT) 109

Affective and evaluative priming tests 112

Summary 120

Notes 121

08 Facial action coding 123

The six primary emotions 124

Automated FACS (aFACS) 127

What it is most useful for 130

Summary 131

Notes 131

09 Biometrics 133

The nervous system 134

Key biometric considerations 135

Heart activity 136

Skin conductance (GSR or EDR) 138

Pupillometry 139

Other measures 141

Pros and cons of biometrics 144

Summary 146

Note 146

10 Neuro-measures 147

fMRI 148

EEG 151

SST 153

Summary 154

PART THREE Putting it all together 155**11 Computational neuroscience 157**

Predicting successful music and movies 159

Predicting where you will look 161

The maths of beauty	163
What will be the role of computational neuroscience?	166
Summary	167
Notes	168

12 Smarter survey design 169

Psychological limits to survey design	170
Theory of planned behaviour	172
Cognitive interviewing	173
Creating smarter surveys	175
Summary	179
Notes	179

13 Combining techniques 181

Some typical combinations	182
Tracking combinations	183
Parallel combinations	184
Visualizing combined results	185
Anatomy of an ad	186
Combining vendors	189
Combining with sales data	189
Summary	191
Note	191

14 Conclusions 193

The future	194
Limitations and ethical issues	196
Narrow explanations could become locked in	197
Doesn't measure longer-term reactions	198

Glossary 199

Further Reading 202
