## **01 Business in the age of disruption 01**

'I wouldn't start from here' 01

The world has changed 01

It's time to ask the hard questions 03

Remember what is not changing 05

Change is a threat at a core level 06

Self-disruption 10

We're in the age of innovation as distraction 11

The depth of change is underestimated 12

The only certainty now is uncertainty 14

It's time to focus on people 16

Key topics to inspire 17

It's time for action 22

References 23

## **PART ONE Change in context 25**

---

## **02 The electrical revolution that never was 27**

The hard sell of electricity 28

Electrification of factories 30

The line drive system 30

The electrical shift 32

Enter the group drive 33

Thinking driven by economists 34

The real change: re-imagining factories around electricity 35

What can we learn from all this? 37

References 45

**03 The three eras of technology 46**

The three phases 48

The pre-electricity age 49

The mid-electricity age 50

The post-electricity age 53

The pre-computer age 54

The mid-computer age 54

The post-computer age 56

The shortening cycles 57

The pre-digital age 59

The mid-digital age 60

The post-digital age 63

How can businesses leverage the power of the post-digital age? 65

Reference 67

**04 Unleashing the power of the paradigm shift 68**

A new theory for disruption 69

The power of the paradigm shift 71

Design as evolutionary funnels 73

Avoiding the local maximum 75

The paradigm leap in action 76

Leaps in design paradigms surround us 82

The lesson from the paradigm shift: we have to break rules 84

Don't let expertise or success kill you 85

Being different is scary 85

Don't apply old thinking to new eras 86

Don't apply old models to new eras 86

Ignore most future models 87

References 87

**PART TWO Unleashing the power of now 89**

---

**05 Digital transformation 91**

An era of bolted-on change 91

Onions 93

The communications layer: the outermost layer 94

The marketing layer: supporting communications 95

The product layer: what you make 95

The process layer: the how	96
Mission	96
A prioritization framework for innovation	97
It's pretty easy to innovate at the edge	98
Innovation at the marketing level	99
Applying new thinking at the process layer: the how	100
Deeper transformation: companies built with new thinking at the core	101
Digitization vs digital transformation	102
Create new value propositions	105
Reference	105

## **06 Starting your disruption 106**

What is your risk level?	107
How vital is this change?	108
Establishing a role	109
Establishing a time to change	112
Four ways to change	113
References	123

## **07 Today's business dynamics 125**

So why don't big companies innovate?	126
Buying innovation is the fashion	127
Accounting and outsourcing risk	128
Establishing a leadership for change	129
Short-termism is killing ambition	129
Success takes time	130
Charismatic leadership	131
An intolerance of bureaucracy	132
Celebrate failure	133
Maximize outcomes, don't minimize risk	134
A sensible view on data	135
Create a process to change	135
References	143

## **PART THREE Anticipating the future 145**

---

## **08 A changing canvas 147**

Digital disappointment	147
What can companies do about digital disappointment?	148

Time limited, stuff abundant	149
Pervasive internet	153
Intimate screens and data	157
One-on-one communications with instant messaging	160
What does this mean for business?	161
Bifurcation of retail	163
Young older people	164
References	165

## **09 Preparing for the new world 166**

Looking further forward is more important than ever	166
It's about empathy not technology	168
Second-order and adjacent technologies	169
Anticipatory computing and seamlessness	170
The predictive web: the Th'Internet	173
Privacy trading	174
Smartness in the cloud	177
Demographic shifts	178
References	183

## **10 Tooling ourselves for the future 185**

Unprecedented levels of unpredictability	186
Rethinking education	188
The comfort of properness and expense	196
Audacity	198
References	199

And in closing 201

---

## **11 A final focus on people 203**

It's not about technology: it's about empathy	204
A focus on empathy and design thinking	208
Final steps for success	210
References	212
